

graduated from Colgate-Rochester Seminary. We anticipate splendid service from this young woman. On retirement of Dr. Berry from the head of the Physics Department, we have been fortunate in securing the services of Dr. Forrest H. Cleveland of Lexington, Ky., who holds the A.B. degree from Transylvania College with summa cum laude honor. He holds the M.S. and Ph. D. degrees from the University of Ky., and has had four years of experience in teaching Physics in that University. In looking up his religious background, we find he was superintendent of the Bible School of one of the largest churches of Lexington, and a member of the Board of Officers of the church. He was also Chairman of the Board of Religious Education. Dr. A.W. Fortune, pastor of Central Church, Lexington, and Dr. V.F. Payne, Chairman of the Faculty of Transylvania College, and others recommend him most highly as a genuine scholar and a Christian leader. We look forward with pleasure to his coming. Miss Rebecca Harvey, graduate of Sargent School of Physical Education, was called to succeed Miss Antrim and has proved herself a most efficient teacher in the field of Physical Education and Biology. She is an excellent young woman whose total influence is wholesome. Prof. Glen Rardin, our efficient Coach, had the misfortune of being seriously hurt in an automobile accident in December and could not return to service again during the session. His life was despaired of for several months. However, the doctor assures us that he can return to his position for session 1935-36. Messrs. Barnum, Trunkey, and Rardin, brother of the Coach, carried the coach responsibilities during the remainder of the session and led the boys to victory in the majority of games.

#### GOVERNMENT COOPERATION:

Through the F.E.R.A. the Government has assisted 36 students in Lynchburg College this session to the extent of \$3,915.00. This amount was paid by the government in nine monthly installments and was credited to each student's account according to number of hours worked by him or her at 30¢ per hour for the particular month. From a letter received recently from the office of Mr. Hopkins it seems that this same policy will prevail again next year although we have no authorization as yet on the matter.

#### GROUNDS AND BUILDINGS:

We have tried to use F.E.R.A. student labor where it would be of permanent material benefit. Much of it has been used in excavating on the hill leading toward the lake from Westover Hall, in an effort to establish additional tennis courts. When finished, there will be four terraces on which will be in service five tennis courts. You, of course, are aware of the impounding of a fifty-acre lake for the college by the use of government funds in building highway # 460 across Blackwater Creek. This lake and highway will greatly increase the real estate value of our properties. All of you should view the lake before leaving today. At present we are in further negotiations with the Lynchburg City Council with a view of securing additional help which would install a 42-inch corrugated iron pipe line in the open ditch which runs from College Drive to Lakeside Drive. The cost of the project will be \$6000 of which the government will contribute approximately \$4000. If and when this work is done, we shall have another excellent athletic field for the young men and we shall be in readiness to proceed with the terracing of the north side of the hill which borders on the south the low ground in which now exists the open ditch.

We have had to expend \$3980 in excess of income from our dormitories this session because the floors in the boys' dormitory had reached such a condition that they had to be scraped in the entire building. The walls, floors, and steam pipe lines in the girls' dormitory have had considerable attention and must have more this summer in order to make it more habitable for our young women.

Sufficient money has been subscribed by a friend to erect memorial gates to the entrance of the campus grounds. One-fourth has been paid in cash
